In line with the University’s goals, the missions of the Department of Physics and Materials Science (AP) are:

(1) To educate students via both undergraduate and postgraduate programs to meet the demands for skilled professions;

(2) To conduct innovative and applied research/development leading to the advancement of science and technology; and

(3) To render professional services and provide resources to the larger community in Hong Kong region.

Organization

Under the headship of Professor Xun-Li Wang, AP has a diverse faculty body of 6 Chair Professors, 9 Professors, 6 Associate Professors and 10 Assistant Professors to support its teaching and learning activities, research development and other endeavours. The Associate Head, General Office and various departmental committees (including Curriculum Committee, Staffing Committee, Performance Assessment Committee, and Laboratory Committee) assist the Head of Department in efficient execution of departmental operations which covers academic programmes management, student affairs, health and safety, infrastructure and support, external relations and publicity matters. The Departmental Advisory Committee and Departmental Executive Committee are the consultative arms of the department in which members of the committee will be invited to give advice on the directions and the new initiatives of the Department.
