STATEMENT OF THE USE OF
RADIOACTIVE SUBSTANCES AND/OR IRRADIATING APPARATUS

Project No. ________________

This form must be completed where it is intended to use or store any radioactive substances and irradiating apparatus. You are required to list all of the substances and apparatus in the following categorization and others as required by statutory regulations in this project. The Radiation Protection Officer (RPO) will examine your list and propose methods and identify the guidance to be applied to this research.

You must also state in detail a clear plan for storage and disposal of the substances during the project period and after the completion of the project.

You may not proceed with this proposal without the RPO's confirmation.

Declaration

I confirm that I have supplied a complete list of all radioactive matter and their manner of use in this project. I have received the relevant safety information and confirm that I understand its application to this project.
